Extract Information (Dentro del proceso del proceso de Process Document>Cut Document)

The screenshot displays the Alteryx Process Designer interface. At the top, a tab labeled 'Process' contains a sub-tab 'Cut Document'. Below this, a workflow diagram shows a 'Cut Document' tool connected to an 'Extract Information' tool. The 'Extract Information' tool has two input ports labeled 'doc' and one output port labeled 'doc'. A green checkmark is visible on the tool icon.

Below the workflow, there are two panels:

- Edit Parameter List: string matching queries**: This panel contains a description: "Edit Parameter List: **string matching queries**
Specifies a list of string matching start and end sequences. Everything between will be used as result. See the operator documentation for details on string matching." Below this is a table with two columns: 'attribute name' and 'query expression'. The first row shows 'url2' in the 'attribute name' column and '=' in the 'query expression' column.
- Parameters**: This panel is titled 'Extract Information'. It contains the following settings:
 - query type: String Matching
 - string matching queries: Edit List (1)...
 - attribute type: Nominal
